PROFESSIONAL EXPERIENCE

DataFutures April 2024 – Present

Analytics Engineer I

- Engineered and maintained 5+ end-to-end order fulfillment workflows, diagnosing and resolving pipeline failures to ensure uninterrupted data flow across AWS and Snowflake systems.
- Built and enhanced AWS Lambda functions in Python to support new business requirements, extending existing workflow capabilities and reducing manual intervention in data processing pipelines.
- Developed 4 Snowflake datasets and dbt models to support a new tool integration, bridging AWS and Snowflake to enable analytics-ready data for downstream consumption.
- Deployed and managed MWAA environments across multiple AWS accounts using Terraform modules; automated deployment pipelines with GitHub Actions to ensure consistent, repeatable infrastructure provisioning.
- Integrated Apache Airflow with Snowflake to orchestrate dbt project runs via DAG triggers, enabling fully automated transformation workflows with end-to-end dependency management using SNS topics and SQS sensor operators.
- Implemented an AWS-Snowflake ETL pipeline using Python Lambda to automate document processing, transforming RTF files into structured CSVs and cutting manual effort by 80%.
- Built a Snowflake-native Streamlit application for on-demand data reporting, reducing report generation time from 30 minutes to under 5 minutes; streamlined email campaign workflows via Mailchimp API integration, saving 2+ hours per campaign.
- Applied Snowflake Cortex LLM functions to build AI-driven sentiment tagging and text classification workflows, automating insights extraction across large volumes of unstructured text data.

AMDOCS, Pune, India June 2019 – August 2022

Software Java Developer

- Built RESTful APIs on Amdocs D1-C1 suite involving designing, developing, testing, customizing, integrating, and deploying microservices for billing services to enhance functionality and customization of the legacy system
- Responsible for leading the implementation of billing service customization to integrate new features in addition to the existing architecture leveraging REST API, and microservices, ensuring no impact on the E2E flow.
- Integrated with third-party services by applying expertise in Relational Database (MySQL) and Kafka to achieve seamless data processing and exchange
- Identified and resolved security vulnerabilities during quarterly SonarScan and patched code smells and bugs, focusing on code coverage using SonarQube's security-focused analysis to create more robust applications
- Performed production testing tasks using Kubernetes, AWS, and OpenShift technologies and developed test suites for performing IAT and UAT of the applications and microservices, ensuring maximum code coverage of up to 90%
- Conducted unit testing using JUnit and Mockito to ensure robust and reliable code, improving test coverage and reducing bugs.

SAMSUNG, Bangalore, India May 2018 – July 2018

Software Developer Intern

EDUCATION

University of North Carolina Greensboro, College of Arts & Sciences, Greensboro NC December 2023

Master of Science, Computer Science (GPA: 3.96/4.00)

Concentration: Big Data & Machine Learning

Second place - Data Dive Contest by Arch MI Mortgage 2023, Outstanding Graduate Student Award

National Institute of Technology, Warangal, India May 2019

Bachelor of Technology, Computer Science (GPA: 7.96/10.00)

TECHNICAL SKILLSET

Languages	C++, Java, Python, SQL
Databases	MySQL, PostgreSQL, Snowflake
Cloud Platforms	AWS, Azure
Tools	Spring Boot, JSON, REST, Postman, GitHub, Bitbucket, Jenkins, Docker, Kubernetes, DBT, Apache Airflow, Streamlit, Snowflake, Terraform

Certifications AWS Certified Solution Architect Associate Sept 2024
